EDUCATION

Senior Year Bachelors In Computer Science
National University of Computer And Emerging Sciences (FAST)

08/2017 - 12/2021   *Pakistan*

Courses
- Machine Learning, Web Development, Database Systems, Data Mining

O-Levels & FSC
Crescent School

08/2012 - 08/2016   *Lahore*

WORK EXPERIENCE

Freelance Developer
Fiverr

12/2018 - Present

Achievements/Tasks
- I have completed a milestone of 250+ orders, 250+ 5 star and is working as a level 2 seller for 3 years.
- Also, I have been working as professional web scrapper and automation engineer for many of my permanent and returning clients. Within this domain I have scrapped around 100+ open source websites to get valuable market data for my clients. Websites include: Facebook, Instagram, Zoopla, Aliexpress, Amazon etc.
- Moreover, I have worked as a data analyst to analyze and present data through live visualization using dash, tableau and power bi. Also, developed machine learning projects like predictor and analyzer. Managed SQL/NoSQL databases and developed websites in Html, Css, Php, Javascript, Django and Bootstrap

Technology Intern
Arthan

03/2021 - 05/2021   *India*

Achievements/Tasks
- I worked on data mining, data analytics and lead generation in close contact with company on various projects.

Data Engineer
Propre Pte. Ltd.

10/2021 - 11/2021   *Japan*

Achievements/Tasks
- Was part of one time project to create a generic scrapper to scrape 100+ websites of property using request

SKILLS

Python | C/C++ | Javascript | Bootstrap | Php
MYSQL | MSSQL | ORACLE | Sqlite | Teradata
MangoDb | Html | CSS | Selenium | R
Tableau | PowerBi | Excel | Data Science Concepts
Analytical mindset | Data Warehousing
Database Concepts | Agile Methodologies
Data Mining | Django | ETL | Data Modelling
Advance SQL | Performance Tuning & Optimization
Statistics & Data Analysis | Effective Presenter
Pandas | Numpy | D3js | Seaborn | Dash

PROJECTS & ACHIEVEMENTS

Store Analyzer (01/2021 - 02/2021)
- Selenium+Bs4 based scrapper to analyze different prices of products from Ebay, Amazon and multiple stores to provide best prices

Facebook Comments Analyzer (02/2021 - 03/2021)
- Developed a bot which scrapes data from Facebook to analyze different reactions and comments done on different pages.
- Core purpose was to analyze the emotions of audience and give each post response in csv file.

Custom Network Simulator (02/2021 - Present)
- A customer network simulator for WIFI (mac layer) which is tailored for machine learning. It generates data using different simulation criteria, extracts data, visualize results and put in machine learning model in Django

Live Analytics Admin Panel (04/2021 - 05/2021)
- I developed admin panel to control store transactions and show current performance though interactive graphs from live data of firebase using dash in python

Resume Parser (04/2021 - 04/2021)
- Developed a resume parsing tool which extract email, name and phone from pdf based resumes. Developed in python using spacy.

CERTIFICATES

Google Data Analytics Certificate (06/2021 - 06/2021)

Certified Web Developer (04/2021 - 04/2021)

Neural Network Deep Learning (03/2021 - 03/2021)
